SOCIAL SCIENCE & MEDICINE

Editor-in-Chief
(Parts A–D)

PETER J. M. McEWAN
Glengarden, Ballater, Aberdeenshire AB3 5UB, Scotland

Senior Editors

Part A
Medical Psychology and Medical Sociology
PETER J. M. McEWAN
Glengarden, Ballater
Aberdeenshire AB3 5UB, Scotland

Part B
Medical Anthropology
CHARLES LESLIE
University of Delaware
Newark DE 19711, U.S.A.

Part C
Medical Economics
DAVID DUNLOP
Department of Community and Family Medicine
Dartmouth Medical School
Hanover, NH 03755, U.S.A.

Part D
Medical Geography
GERALD F. PYLE
Department of Geography & Earth Science
University of North Carolina at Charlotte
UNCC Station
Charlotte NC 28213, U.S.A.

(BR = Book Review)

Aims and Scope

Social Science & Medicine was established to aid the dissemination of important research and theoretical work in all areas of common interest to the socio-behavioural sciences and medicine, including psychiatry and epidemiology. The Editors and the Publisher hope to encourage the exchange of ideas and information throughout the world among those engaged in different disciplines who are focusing their attention on aspects of the inter-relationships between the various branches of medicine and the social sciences. Papers will be published covering all those aspects of anthropology, economics, education, geography, psychology, social work and sociology which directly relate to any of the problems of mental and physical health, and all those aspects of medicine, including epidemiology, medical education and practice, psychiatry, public health and nursing which directly relate to any of the social sciences. The Editors invite for editorial review and rapid publication original reports of systematic studies and research in which at least one variable is concerned with medicine, medical education or medical services. They are equally interested in receiving significant and relevant theoretical contributions. *Additional features* will include: book reviews, proceedings of symposia, monograph supplements, details of research (planned and in progress), correspondence, and news.

Information for Contributors

Manuscripts for review (including long research reports) should be sent, in triplicate, directly to the Editor-in-Chief or to the relevant Senior Editor and will be published within six months (or less) of acceptance. Books for review should be sent to Dr Stoeckle. Inquiries regarding the publication of symposia should be sent to the Editor-in-Chief.

Style of Manuscript

General Form: Manuscripts should be typewritten on one side of the paper only, with double spacing and liberal margins. Manuscripts should be submitted *in triplicate*, i.e. an original and two carbon copies. The title of the paper and the author's name and address should be given on a covering sheet. The manuscript and diagrams will be discarded one month after publication unless the publisher is requested to return the original material to the author.

Abstract: A short abstract (not exceeding 400 words) must accompany the manuscript on a separate sheet.

References: References should be cited in the text as consecutive, bracketed numerals and the list placed at the end of the article (not as footnotes on each page) in numerical sequence. The list should include the author's last name, initials, title of article in the original language, name of periodical abbreviated in the style of the *World List of Scientific Periodicals* (4th edition), with volume, page and year. For example:

1. Proshansky H. M., Ittelson W. and Rivlin L. G. Freedom of choice and behavior in a physical setting. In *Environmental Psychology: Man and His Physical Setting* (Edited by Proshansky H. M. *et al.*) p. 127. Holt, Rinehart & Winston, New York, 1970.
2. Willie C. V. The social class of patients that public health nurses prefer to serve. *Am. J. publ. Hlth* **50**, 1126, 1960.

Should the author be uncertain of the acceptable abbreviation he should quote the Publication name in full in the order and manner shown above in (2).

Illustrations: Illustrations and tables accompanying manuscripts should be numbered, provided with suitable legends, and marked lightly on the back with the author's name. Figures and tables may now be reproduced directly by photo-offset methods. For guidance on how best to prepare figures and tables suitable for direct reproduction, please consult the photoreprographic department of your institution which will give you assistance. Authors should indicate on the manuscript the appropriate positions of tables and text figures. A reasonable number of half-tone illustrations will be reproduced free of cost to the author, but special arrangements must be made with the Editor for colour plates, elaborate tables, or extra illustrations. Copy for line illustrations (such as pen drawings and charts) must be drawn and lettered in India ink, or black typewriter ribbon may be used for lettering. Should Greek letters or mathematical symbols be required in a table it is better, if you do not have the appropriate typewriter symbols, to indicate what is required in pencil in the margins rather than to write by hand onto copy which could otherwise be directly reproduced. Only good glossy photographic prints should be supplied for half-tone work; original drawings, not photographs of them, should accompany the manuscripts.

Publication Languages: English, French, German or Spanish.

Refereeing Procedure

To ensure fairness, each manuscript will be assessed anonymously by at least two independent reviewers. Constructive criticism provided by the assessors will be forwarded to the author.

Reprints

Unless otherwise requested, each senior author will receive with his page proofs a reprint order form which should be completed and returned to the publisher with the proofs. The form may also be used to order copies of the issue at a specially reduced rate.
